

EASY-SET

The difference is in the jaws™

U.S. Patent No. 6,783,123

6" Machine Vise Jaws to fit Kurt Style Milling Vises

The Original **EASY-SET** Vise Jaws with built-in adjustable parallels features:

- Four rows of pins with minimal part contact provides greater parallel accuracy.
- Retractable pins as the vise closes, thinner parts can be held.
(Imagine holding a 6" scale parallel and being able to mill the edge accurately)
- Hold parts on a 5, 10, 15, 30, or 45 degree angle, hold rounds, or irregular shaped parts, without any other fixturing needed.
- Use one of the above row pins as a stop for accurate part changing.
- Use with any other fixturing you need without losing the integrity of the vise.
- Optional fixed pins for production runs maintains true position, just remove the desired row of retractable pins and replace with the fixed pins.

EASY-SET Harmony™ Vise Jaws features:

- Use standard 1/4" Dowel Pins
- Same great pattern as *The Original EASY-SET Vise Jaws*
- Four rows of pins with minimal part contact provides greater parallel accuracy
- Hold parts on a 5, 10, 15, 30, or 45 degree angle, hold rounds, or irregular shaped parts, without any other fixturing needed
- Use one of the above row pins as a stop for accurate part changing
